

An LLM should never own your numbers. *It should explain them.*

The current state, the target architecture, and the **conditions that decide whether it succeeds.**

	01 / CURRENT STATE	02 / TARGET STATE · AI-AUGMENTED
DATA COLLECTION	✗ Manual exports, re-keying, versioned spreadsheets	✓ Read-only pipelines from ERP and sources <i>data pipeline</i>
FIGURES	✗ Excel formulas, broken links, silent errors	✓ Every figure computed by code, reproducible <i>deterministic engine</i>
COMMENTARY	✗ Written at 11pm on closing day	✓ AI-drafted, controller-approved <i>LLM + evals</i>
TRACEABILITY	✗ "Ask whoever built the file"	✓ One step from figure to source <i>audit trail</i>
MANAGEMENT ACCESS	✗ Wait for the pack, then email Finance	✓ Ask the numbers directly <i>governed copilot</i>

03 / TARGET ARCHITECTURE

BENACTA / CONTROLLED INTELLIGENCE ARCHITECTURE · FIN-AI-001

RULES → CODE · KNOWLEDGE → RETRIEVAL · INTERPRETATION → AI · ACCOUNTABILITY → HUMAN

Engineer the truth. Augment the judgment.

04 / Six design principles for AI-augmented finance

I. CFO SPONSORSHIP

A finance transformation, not an IT side-project. The sponsor sits in finance.

II. ONE PROCESS FIRST

Prove it on one cycle, such as the monthly close, in 6 to 8 weeks. Then scale.

III. ARCHITECTURE BEFORE TOOLS

Fix the boundaries first: code computes, AI drafts, humans decide. Then select tools.

IV. AUDITABILITY BY DESIGN

Every figure traces to its source. Trust is the currency of adoption, and of auditors.

V. TEAM IN THE LOOP

Augment controllers, never bypass them. Today's validators become tomorrow's adopters.

VI. MEASURE VS BASELINE

Run evals against the current process: accuracy, cycle time, cost. Proof over demos.

05 / PROOF AND BENCHMARKS

INDUSTRY EVIDENCE

58%¹

OF FINANCE FUNCTIONS ALREADY USE AI, UP 21 PTS IN ONE YEAR

Illustrative: for a €100M-revenue company, top-quartile finance cost is worth ≈€450k a year. — Sources : 1. Gartner, CFO & Finance AI Survey, Sept, 2024 · 2. McKinsey & Company · 3. PwC, Finance Effectiveness Benchmarking 2024 · 4. APQC, Open Standards Benchmarking

CAPACITY

42%²

OF FINANCE WORK IS AUTOMATABLE: CAPACITY MOVES TO ANALYSIS

COST GAP

-45%³

TOP-QUARTILE FINANCE COSTS 0.55% OF REVENUE VS ~1% MEDIAN

BENCHMARK · TOP QUARTILE

≤ 5 days⁴

MONTHLY CLOSE FOR TOP-QUARTILE PERFORMERS
